CORE SKILLS

Problem Solving

Teamwork

Communication

Project Management

Cloud (Azure, AWS, Oracle Cloud)

Database (Oracle / MongoDB / SQL)

BI Tools (PowerBI , Looker , Microsoft Fabric)

Data Warehouse (Snowflake / GCP)

Programming

ETL/ELT (Talend / Informatica / Airbyte)

DevOps(Docker, Kubernetes, Terraform,

CI/CD)

EDUCATION

Middlesex University Mauritius

BSc Computer Science & System Engineering

2025

Queen Elizabeth College

Higher School Certificate

2023

AWARD & CERTIFICATIONS

Certified in Cybersecurity (CC)

ISC2

Certified Data Science Professional

Oracle

Certified Multicloud Architect Professional

Oracle

Certified Generative AI Professional

Oracle

AWS Skill Badges

PROFESSIONAL OVERVIEW

Machine Learning Engineer with nearly two years of hands-on experience across data engineering, business intelligence, machine learning and MLOps. Takes data from source to insight, owning everything in between. Built the company's highest-revenue digital initiative end to end. Enjoys taking ownership, learning new technologies and delivering work to a high standard.

CAREER TIMELINE

Machine Learning Engineer | Data & AI Winners (IBL Group)

NOV 2025 – PRESENT

- Led and built Retail IQ, one of the company's highest-revenue digital initiatives, end to end in just 3 months, using embedded Power BI, Microsoft Fabric and Azure.
- Build Power BI dashboards that turn business data into clear, actionable insights.
- Project owner of the promotion optimiser project that finds the best promotional price for each product and analyses promotions, find trends and analyses competitor's data.
- Contributed to a churn prediction model that identifies loyalty-programme customers at risk of leaving.
- Built a string matching algorithm to match the same product across different systems.
- Designed a full Snowflake backup solution on AWS.
- Automated manual tasks for other departments using Apache Airflow
- Build and maintain ETL/ELT pipelines that transform millions of rows daily from the ERP and from Oracle and SQL Server sources.
- Work in Snowflake daily, continuously improving the performance and efficiency of the data warehouse.
- Work with Airbyte for data ingestion, and currently building custom scripts that mimic CDC (change data capture) to bring live data changes from Oracle into Snowflake.
- Manage MLOps and DevOps for the team, including GitHub CI/CD pipelines that automatically test and deploy code, and infrastructure as code with Terraform.
- Work with commercial and other departments to gather requirements and turn them into reports, datasets and data models.

Data Analyst | Data Insights & Analytics Checkout.com

AUG 2025 – NOV 2025

- Built a cost of service model showing each department what it costs to handle its customer support tickets.
- Built dashboards in Looker and Zendesk using data from snowflake/GCP.
- Automated maual tasks using Zapier

App Development Associate | Data & AI Accenture

MAY 2025 – AUG 2025

- Built, tested, and deployed interfaces using the Informatica Application Integration Platform.
- Designed and implemented data pipelines and transformations with Informatica Data Integration Platform.
