Machine Learning Engineer with almost 2 years of hands-on experience across data engineering, business intelligence, machine learning and MLOps. Bridges the gap between raw data and business value, building end-to-end solutions from data pipelines to actionable insights. Led the end-to-end development of one of Winners' highest-revenue digital initiatives, delivering it in just three months. Combines strong technical ownership with a drive to solve complex problems and deliver real business impact.

SKILLS & TOOLS

- Soft Skills: Problem Solving, Teamwork, Communication, Project Management
- Cloud: Azure, AWS, Oracle Cloud
- Data Engineering: Snowflake, dbt, Airflow, Airbyte, Talend, Informatica
- Database: Oracle, MongoDB, MySQL
- BI Tools: Power BI, Looker, Microsoft Fabric
- Programming: Python, Javascript
- DevOps: Docker, Kubernetes, Terraform, CI/CD

WORK EXPERIENCE

WINNERS

Machine Learning Engineer | Data & AI | Nov 2025 - Present

- Led and built Retail IQ, one of Winners' highest-revenue digital initiatives, end to end in just 3 months using embedded Power BI, Microsoft Fabric and Azure.
- Own the development of the promotion optimisation engine that finds the best promotional price for each product and analyses promotions, find trends and analyses competitor's data.
- Contributed to a churn prediction model that identifies loyalty-programme customers at risk of leaving.
- Built a string matching algorithm to match the same product across different systems.
- Assisted in building an AI agent that automates daily tasks.
- Build and maintain Power BI dashboards that turn business data into clear, actionable insights.
- Designed a full Snowflake backup solution on AWS.
- Work daily in Snowflake's medallion architecture (bronze, silver, gold), continuously improving the warehouse and adding new capabilities.
- Automated manual tasks for other departments using Apache Airflow
- Build and maintain ETL/ELT pipelines that transform millions of rows daily from the ERP and from Oracle and SQL Server sources.
- Develop front-end and back-end applications with FastAPI and Streamlit to present analysis and model results in interactive tools that business teams can use.
- Work with Airbyte for data ingestion, and currently building custom scripts that mimic CDC (change data capture) to bring live data changes from Oracle into Snowflake.
- Manage MLOps and DevOps, including GitHub CI/CD pipelines that automatically test and deploy code, and infrastructure as code with Terraform.
- Work with commercial and other departments to gather requirements and turn them into reports, datasets and data models.

CHECKOUT.COM | Aug 2025 - Nov 2025

Data Analyst | Data Insights & Analytics

- Built a cost of service model showing each department what it costs to handle its customer support tickets.
- Built dashboards in Looker and Zendesk using data from snowflake/GCP.
- Automated manual tasks using Zapier

ACCENTURE | May 2025 - Aug 2025

App Development Associate | Data & AI

- Built, tested, and deployed interfaces using the Informatica Application Integration Platform.
- Designed and implemented data pipelines and transformations with Informatica Data Integration Platform

EDUCATION

COMPUTER SCIENCE & SYSTEM ENGINEERING | BSc

Middlesex University Mauritius | 2025

HIGHER SCHOOL CERTIFICATE

Queen Elizabeth College | 2023

CERTIFICATIONS

CERTIFIED IN CYBERSECURITY (CC) | ISC2

CERTIFIED DATA SCIENCE PROFESSIONAL | ORACLE

CERTIFIED GENERATIVE AI PROFESSIONAL | ORACLE

CERTIFIED MULTICLOUD ARCHITECT PROFESSIONAL | ORACLE

MACHINE LEARNING SPECIALIZATION | DEEPLEARNING.AI
